

VIDEO RECORDED PRESENTATION GUIDELINES

17-18 DECEMBER 2024

On behalf of the ISoMER 2024 Organizing Committee, we would like to thank you for joining our hybrid conference. You need to create Pre-recorded video for your work to deliver your research to the audience in a more effective way, thus making the conference more informative, valuable, and engaging for other attendees.

Participants may opt to present via live streaming using Google Meet platform. Participants **must** attend their presentation session (please refer to the **Program Schedule**) to receive the **Presenter Certificate** which will be emailed to the presenters at the end of the conference.

LIVE STREAMING USING GOOGLE MEET PLATFORM

Pre-recorded videos will be displayed during the symposium events. In your pre-recorded video you must include your **email address** and **affiliation** at the end of your presentation. Your pre-recorded video should be **NO longer than 10 minutes** and in **MP4 format with a maximum size, 50MB. Compress your file if it exceeds this limit.** Presenters should appear in pre-recorded videos and your **face must be visible** in the video. You may use the **ISoMER 2024 Presentation Template** available in the **Presenter Kit**. Keep videos and animations in your presentation to a minimum to minimize video/audio lag and connection issues.

To ensure a smooth presentation during your session, you are advised to **be submitted a pre-recorded video on 18 December 2024, by 12 pm.** Namely your prerecorded videos file as a **full name, Paper ID and Title of your paper.** The pre-recorded videos need to be uploaded using this link: <https://forms.gle/4xZyHzJoXqw1ExRH9>.

Should you have any questions, please contact us at isomerunimap@unimap.edu.my.
